

I want to take this opportunity to express my opposition to the possible merger of AT&T and T-Mobile. The result of having only two major companies, with a distant third competitor, cannot possibly work out in the interest of the American consumers and will promote practices that take advantage of an environment void of choice.

Please consider the consequences of allowing a company, one that has already been broken up before, from becoming too big again. Please use your authority to maintain a market where competition will provide us choice and protection from monopolistic behavior.

Thank you
